

# Kitchen & Vanity Faucet

## Overview:

Combina Global's faucets are crafted from high-quality brass, selected for its superior corrosion resistance, aesthetic appeal, durability, fire safety, and health benefits. Brass is one of the most widely used materials on the market, known for its well-established manufacturing process.

## Key advantages of our brass faucets include:

- **Corrosion Resistance:** Brass has excellent corrosion resistance, protecting against chemical substances in water and ensuring long-lasting use.
- **Antibacterial Properties:** Copper ions have strong disinfectant and sterilization effects, which can help prevent the spread of certain common diseases. Additionally, copper plays a vital role in human health, impacting the blood, central nervous system, immune system, as well as the development and function of hair, skin, and bone tissue.
- **Aesthetic Appeal & Durability:** Brass faucets offer a beautiful, elegant appearance and exceptional durability, maintaining their quality and performance over time.
- **Cost-Effectiveness:** Compared to galvanized steel and plastic pipes, copper water pipes provide a superior price-performance ratio.
